

It is my intent to continue building this shared vision together!

Demonstrating this vision through three lenses, converging to effect both socioeconomic as well as sociopsychological objectives in scope, evoking increasingly perpetually balanced, stable and sustainable markets of lowered systemic risk. Championing ethical values, empathy, symmetry, transparency, and the most advanced scientific methods to influence global consciousness and cooperation in international investments.

It is my hope that you not only perceive this opportunity to facilitate positive influence, but also feel a sense of urgency and take action with your collaboration, endorsement & or promotion moving forward.

This is a Legacy Opportunity!

Expanding on the shared vision of Sovereign Wealth

The 3 Lenses,

1) Improved Forecasting Models

a) Can better predict, manage as well as cope with crisis, technological disruptions, cultural revolutions & automation utilizing the scientific method in conjunction with stochastic processes.

b) Applying these models simultaneously through central banks globally we can effect positive sociopsychological influences both rebranding and fundamentally changing the core of the Fractional Reserve Central Banking Systems scope of market influence. With,

2) Sovereign Wealth Funds

a) Principally new in nature being publicly owned by holding companies, actively & privately managed, absent partisan influence, by successful credentialed fund managers in mutual collaboration between each other as well as in cooperation with their respective central bank can more nimbly address technological & automation disruptions, regional crisis and revolutions promoting market stability.

b) Adding symmetry (reflective equilibrium) to our current economic system by introducing a public & privately managed influence in our FRCBS for the people, can increase perception through financial involvement of and in populations social consciousness as well as provide significant, inclusive and versatile "Monetary Tools".

c) Affecting further positive social psychological influence with Internationally cooperative mutually beneficial/amicable investments as savings, reserve, stability and development funds between cultures and Nations.

3) Thorium Molten Salt Reactors

a) Interconnecting this fourth generation "walk away safe" less-fissile (requiring 5 recaptures to become fissionable) nuclear fuel, diversifying our energy portfolio strategically for disarmament.

b) Provides a permanent source of revenue for our coalition of funds.

- c) Addresses climate change.
- d) Offers a sustainable solution to the energy needs of emerging markets.
- e) Further Thorium provides an alternative to current calls for nuclear proliferation in the name of power for the people, by providing a cleaner, more abundant (4X) and safer alternative to uranium in mixed oxide (MOX) fuels to minimise the generation of transuranics (nuclear waste) and maximise the destruction of plutonium. (exceeding 90% energy extraction)
- f) Over and above Thorium grants us greater influence to positively affect the sociopsychological paradigm of the global community.

By implementing the scope of these facets simultaneously on a global scale transparently, leveraging social and traditional media to involve educate & provide to the public, patriotic economic development as individual nations (Independent SWFs) as well as an international community (Coalition of SWFs) we leave the next generation positioned for continued growth, prosperity and international cooperation. Facilitating global financial stability in a new humanitarian age of shared philanthropic initiatives.

To that end I have included eleven attachments. Five regarding improved forecasting models, three developing on Sovereign Wealth and three around Thorium. Including the 1962 Presidential Atomic Energy Commission report to JFK recommending MSR Technologies (Thorium) for all civilian commercial applications. Note MCN - SWF - Exec Summary² is geared towards funding, however I am not soliciting funds from you personally or the public at this time and instead further expanding on the intent of Sovereign Wealth moving forward. I'll be happy to share a substantial collection of published work on Sovereign Wealth Funds, should you be interested in drawing your own conclusions from the available data, however Dr. Thierry Kame Babilla has provided a comprehensive, balanced & unbiased summary.

1) SOVEREIGN WEALTH FUNDS

A great opportunity for the global financial world, but a potential threat for both host country and home country.

By Dr. Thierry KAME BABILLA

Who has produced an excellent summarization of the positive influence of SWF's over time as well as current & future potential hazards.(attached)

2) Executive Summary For Sovereign Wealth Funds Management Company.

By Mike Nwogugu, MBA

Mike brilliantly summarized and streamlined my Initial Intent, while grasping firmly the essence and spirit ment to be conveyed. (attached)

3) UPGRADING THE ACCURACY OF ECONOMIC AND FINANCIAL FORECASTING

within the research & analysis activities of the SWFs

By Volodymyr Ryaboshlyk, Ph.D,

Centre for Innovation Development at National University of "Kyiv-Mohyla Academy"
Deputy Minister of Economy of Ukraine (2005)

Former Professor at the Finance and Law Academy of Brovary
Ukraine

<http://www.palgrave.com/gp/book/9781137477064>

Having garnered the support of academia, responding to hundreds of inquiries from economic professors & PhD's the world over as well as successfully connecting with well over one hundred central bankers representing every major economy, along with a number of National Treasuries and government officials.

The current focus is on forging life long value added professional relationships with prestigious, successful and established funds, institutions and most importantly individuals. Initially as perhaps a lesion facilitating commercial, industrial & or residential Real Estate opportunities within this expanding network. Building a transactional history, raising the seed capital required for proper incorporation, structuring, governance, securities registration, portfolio origination & allocation ("lawyering") as well as a substantial capital raise (whether that be with the central bank and Treasury) or by utilizing traditional in conjunction with creative avenues.

Already having commitments from esteemed economic professors, PhD's, CEO's & compliance officers to sit on our board, we will hire (if they have not already come forward) successful & credentialed fund managers. Meanwhile, I will continue to procure real estate opportunities, as Sovereign Wealths sphere of influence goes about the business of facilitating sister funds across the globe simultaneously. Having Sovereign Wealth US as the initial fund & established template or (mental construct) all that will be required is the raising of initial capital. Properly executed & riding the wave of momentum Initially created by SWUS's successful incarnation.

Already having colleagues in place, I expect evoking our international core coalition of major economies to be established with open lines of communication transparently between the funds as well as their respective central banks to be functioning efficiently within a few years. In fact this is already a global concept, supported by a preponderance of evidence, both in published research papers as well as mathematically to be in the best interests of the global economy as well as all peoples. Even before I was able to fully convey effectively this concept professionally in it's entirety, there has only been support.

"Intriguing" (being the most common reply)

Respectfully there are those who say "they are not going to let you do it". To them I can only reply humbly, "Who are they?" & "I am not asking for permission", this is NOT what I think to be right or some clever attempt to stick it to the man & or "End the Fed," but a thoughtfully considered creative solution, building on and improving the existing

system. This has already been presented to the professional world. "Hearing only silence and praise from those who I expected would tear it asunder."

Should you possess a free creative mind and perceive a significant negative effect that has been overlooked this far, I will be happy to work with you on addressing the concerns.

"It will be my pleasure to address any inquiry professionally with concern, empathy and patience!"

I do not intend for this coalition of funds to be owned or influenced even in part by investors or myself. These funds are to be held wholly by the people they represent. There is no scenario short of an unprecedented demonstration of public, private, individual, corporate & institutional cooperation in which I condone any "facilitating party" to gain ownership of this vision. Instead I propose a sense of shared ownership through collaboration.

"Only by there being no "owners" can Sovereign Wealth be everyone's."

This is a gift to the peoples of the world, not an opportunity for any individual or corporations personal enrichment.

Welcome to a new Age of national capitalist investment both at home and abroad invoking perceived cooperation and prosperity!

"With the support and inquiry of our peers do we bring dreams to fruition."

Recently concerns internationally have been raised, continuing to gain momentum.

<https://youtu.be/s7eLD38oj58>

<https://youtu.be/KeV9Yn5ZzKU>

Sovereign Wealth provides the best way forward for all Nations to Rebrand/Channel, the negativity around the deep emotional stir patriotic citizens experience when learning the hard economic truth of financing the Sovereignty of Nations.

Association of value changing (with International recognition) from the Physical Person/Body Birth Certificate "slavery" to the inherent (Quantitative) value of one's "Free Creative Mind"/Mentality or Intellectual property & Potential value" In this way patriotic citizens in each respective nation, compelled to participate and contribute to success, respect and prosperity of the country is symbolically "freed" and encouraged to,

"Think and be rich". Empowering citizens to be more, to dream!

The intrinsic beauty is moving forward the economic value of further educated and creative minds is, both in benefit of the People as well as the State. Further addressed are economic concerns around "Fiat Monetary policy" as a note we exchange to represent ones contribution in both private and public capacities. Recognizing one need Not to be "physically" present to be entitled to compensation.

Infrastructure now becomes the contribution of past generations, providing for the quality of life we have as a community, building together internationally with shared vision in higher objectives. Cash should be labeled what it is, "the grease of economic engines" and representative of the facilitative value provided by States to the people, whose intrinsic value is derived from the underlying infrastructure and services provided by the State to ensure an improved quality of life with abundant opportunity for personal and professional development & the ability to stay competitive internationally.

https://youtu.be/hdrrFM0_VFA

Beginning with these and other independent videos, presents Sovereign Wealth as the needed creative solution of the people, that it is & allows us to reach the fringes of society with a grass roots movement. Unifying the Nation in creating a new honest economic understanding based on higher shared objectives. Recognizing that without the "free creative minds" of skilled citizens the State will fall into disrepair and collapse, while producing the terrorism and extremism we continually see sprouting up in oppressed communities around the world.

I look forward to your thoughtful collaborations and wish you success in all your endeavors.

"By the inquiry and support of our peers, we bring visions to fruition."

Dr. Mario Svigir,

As long time macroeconomics, economic policy and international economics lecturer and consultant practitioner engaged by agencies such as USAID, IBRD, ILO and as someone who has attained his PhD in economics in the field of state and public entities governance I am inclined to provide expert testimony and support for the view that sovereign wealth funds:

- a) belong not just to present global economy reality in the best part of the 20th century economics mainly related to governance over social security and state resources funds (oil, state properties of various kind) also in form of closed/funds agencies entrusted with governance of state financial and non-financial surpluses
- b) This idea is compatible with current and further developments of national and international economics in responding to current demand for more involvement of state and taxpayers at large focusing on more prominence of sovereign development goals also reflecting overall increased demand for more economic equality and

sustainability of any modern economy in a changing global environment.

c) Sovereign wealth funds innovate in the sense that they introduce the idea of private governance over state resources for the sake of entire population, acting as new institutional actors, filling in the void between and being complementary to monetary activity of central banks and fiscal activities of states. I endorse this institutional innovation and find it visionary in shaping future of national development and wealth landscape.

Sincerely warm regards, Lee
